

PRODIGENCE

Production Intelligence for Manufacturing

Stop wasting hours on manual production tracking.
Get AI-powered tools that actually work.

THE PROBLEM

Manufacturing Leaders Are Drowning in Manual Work

30+ Minutes Per Report

Manual production tracking wastes hours every single day.

Missing Critical Issues

Equipment problems found too late because you're buried in spreadsheets.

No Shift Comparisons

Can't see patterns or identify root causes quickly enough.

Consultants Don't Help

They charge \$50,000 for reports. You need tools that work TODAY.

THE SOLUTION

AI-Powered Production Tracking That Actually Works

- Reads your existing process logs automatically
- Analyzes production data in 5 seconds instead of 30 minutes
- Generates insights and catches issues immediately
- Built by an operations leader who uses it daily
- Practical tools, not consultant theory

From 30 minutes of manual work → to 5 seconds automated

HOW IT WORKS

Simple. Automatic. Effective.

Reads Your Process Logs

Works with your existing log format. No system changes required.

Analyzes Automatically

AI processes all shifts, calculates OEE, identifies patterns.

Generates Insights

Highlights issues, compares shifts, shows trends immediately.

Dashboard & Reports

Real-time dashboard + automated daily/weekly email reports.

PRICING

Three Tiers. One Goal.

Choose based on your needs and scale

STARTER

Excel Tracker

\$299

one-time

- ✓ Pre-built Excel template

ENTERPRISE

Full System

\$15,000

setup

- ✓ Complete integration
- ✓ Web dashboard
- ✓ Automated reporting
- ✓ Predictive maintenance
- ✓ Team training & support

PROVEN RESULTS

Real Operations Leader. Real Production Floor.

Thousands

Tracked Daily

Across all shifts, automatically

3 Hours

Saved Per Week

No more manual data entry

5 Seconds

Analysis Time

Instead of 30+ minutes

24/7

Monitoring

Catches issues immediately

"I use this system every single day to run my production floor."

WHO BUILT THIS

Not a Consultant. An Operations Leader.

● **10+ Years Manufacturing Experience**

Not someone who visited a factory once. Someone who runs production every single day.

● **Built the Tools I Actually Needed**

Got tired of wasting hours on manual tracking. Built AI tools to solve my own problems.

● **I Use These Tools Daily**

This isn't theory. It's the actual system tracking my production floor right now.

● **I Speak Your Language**

No consultant BS. No transformation frameworks. Just practical tools that work.

Prodigence was built by someone who understands your problems because I deal with them every day.
